consent_read	[ENUMERATOR] Read the information and consent form fully.	
consent	(Consent1) Introduction: Hello, my name is [enumerator]. I am working for Innovations for Poverty Action - a non-profit development research organization based in the US and Uganda. We are currently conducting a research study funded by the United States Agency for International Development and previously contacted you between April and December 2021 to ask you questions about your household and your current situation. We may have also followed up with you in January or February 2023. We are now contacting you again to follow up about your household's livelihood and wellbeing to better understand the welfare of people like yourself over time. This study covers approximately 13,000 households like yours in the Kamwenge area. Invitation to participate: We would like to invite you to participate in this survey. I would like to remind you that this study involves research, which is different from just receiving routine care or other program services, since we are trying to learn about households' welfare over time rather than only providing services. If you agree to participate, I will ask you questions about your household, for example your income sources and your wellbeing. Your participation is completely voluntary. You can refuse to answer the entire survey, stop the survey at any time by informing me that you wish to do so, or can tell us when a question makes you uncomfortable and we will skip that question. You will not lose any benefits that you currently receive if you decide not to participate in this survey. The survey will take approximately an hour and half to two hours to answer. All identifying information will be encrypted and will not be made public. Only the members of the research team will have access to them. We would also like to use the tablet computer to record our current location and make audio recordings of your answers. This information will help us collect accurate information and may also be used to take into account respondents' cultural backgrounds and other information that can tell us more about how someone is doing. As with all information we collect, it will be used for research purposes only. All the recordings will be encrypted and kept confidential. The recordings are voluntary and are not a requirement of participation in this survey. We will not record them against your will, and you will be asked to confirm if you agree at the beginning of the survey. All recordings will be destroyed after the end of the study. We are currently not planning another survey round but might visit you again in future to ask you about your welfare over time. You are free to decline participation in the future survey if you wish. Risks: If any question in today's survey makes you uncomfortable, please remember that you are free to skip any question you don't want to answer or stop this interview at any time. As with all research, there is a chance that confidentiality could be compromised; however, we are taking precautions to minimize this risk. Your information or information that may identify you will be kept as confidential as possible, to the extent allowed by local standards. We will disclose this information only with your permission or as required by law. The answers you provide will be stored securely in electronic form. Your name and any other identifying information will only be accessible to the affiliated researchers and will never

	appear in any sort of report that might be published or shared with organizations who may be interested in the results. Even if we first remove your name and other information that could directly identify you, your research information will not be used or shared with other researchers for future research studies. There are no other anticipated risks from your participation in the study. This study has been approved by the accredited Ugandan based Research Ethics Committee MUREC. Benefits: You will receive a bar of soap as a token of appreciation for your participation. Apart from that, you will not receive any program or services just by participating in this study. However, the information you provide will be very valuable in understanding more about the people in this area. Withdrawal: You may withdraw from this study or skip any question at any time and without any explanation. There will be no consequences for deciding to withdraw or skip a question. You can use the contacts that we have provided you with to inform the research team that you would like to withdraw after the interview. There are no circumstances under which the research team will withdraw you from this study against your wishes. Questions & Concerns: Please ask us anything you want to know about this project now or later. If you have questions in the future regarding the research, please contact one of the members of our team: Lawrence Rubanga, Field Manager at IPA Uganda, Tel: 0775038619. If you have questions about your rights as a research subject or regarding any damage attributable to the research and wish to discuss this with someone not involved in the study, you may contact the Mildmay Uganda Research Ethics Committee (MUREC) at 0392174236 or the Uganda National Council of Sciences and Technology (UNCST) at 0414705500. Sponsor: This research is funded by the United States Agency for International Development Office of Food for Peace, which aims to reduce hunger and malnutrition. Have you understood everything, and do you agree to participate in this survey? You can take 15 minutes to decide.
